

TECHNICAL DATA SHEET
#41 FLOOR SEALER

DESCRIPTION: Water based vinyl polymer designed to seal and protect wood.

SUGGESTED USES: Floor sealer, designed to be used in areas with high moisture levels such as bathrooms and kitchens. #41 will seal and protect wood and is designed for interior use only.

TYPICAL PROPERTIES:

Viscosity	- 25-125 cps.
pH	- 7-9
Color	- Green or Clear
Solids	- 18-22%
Lbs. per Gal	- 8.6
Diluent	- Water
Dry Time	- 15-30 minutes. Will vary with substances and weather conditions.

APPLICATION: Product can be brushed, rolled or sprayed. Apply an even coat over the entire surface to be protected avoiding puddling the product.

COVERAGE RATE: Coverage rate will fluctuate depending on the porosity of wood being used. The recommended spread rate for most materials is 250-450 square feet per gallon.

HANDLING AND STORAGE: results Store in cool dry area. Keep from freezing. For best we recommend the purchase of fresh product at least every 3-4 months.
